

STAKEHOLDER CONSULTATION REPORT

PUBLICATION DATE **05.05.2022**

VERSION **v. 2.0**

RELATED SUPPORT

TEMPLATE GUIDE Stakeholder Consultation Report v.2.0

This is a report template to be used for filling the information pertaining to Local Stakeholder Consultation and Stakeholder Feedback Round conducted in line with the [Stakeholder Consultation and Engagement Requirements](#).

This document contains the following Sections

[Key Project Information](#)

[Grouped Consultation Information](#)

[SECTION A - Information made available to Stakeholders](#)

[SECTION B - Invitations made to Stakeholders](#)

[SECTION C - Report of the Consultation Process](#)

[SECTION D - Continuous input / Grievance mechanism](#)

[SECTION E - Stakeholder Feedback Round](#)

This template has been revised to aid a consistent interpretation and to better support project developers submitting documentation for certification. Please read the accompanying guide to understand how to complete this template accurately.[_](#)

TEMPLATE GUIDE Stakeholder Consultation Report v. 1.2

Please delete blue text boxes upon completion

KEY PROJECT INFORMATION

GS ID of Project	GS12966
Title of Project	GS12964 VPA-2 Clean Water and Beyond in Africa PoA- Nigeria
Version number of this Report	2.0
Completion date of version	25/09/2024
Time of First Submission Date	27/07/2024
Start Date of the Project	01/01/2025
Date of Meeting (s)	24/02/2024
Project Cycle:	<input checked="" type="checkbox"/> Regular <input type="checkbox"/> Retroactive

GROUPED CONSULTATION INFORMATION

GS ID of Real Case VPA	GS12966
Title of Real Case VPA	GS12964 VPA-2 Clean Water and Beyond in Africa PoA- Nigeria
Geographical Boundary of Grouped Consultation	Nigeria
Technology covered by the Grouped Consultation	N/A
Validity Period	N/A
Anticipated number of VPAs	GS12964 GS12966 RVPA-1 Clean Water and Beyond in Africa- Nigeria (The regular VPAs shall be submitted for inclusion within two years of the grouped physical meeting as per requirement)

SECTION A. INFORMATION MADE AVAILABLE TO STAKEHOLDERS

A.1. Preliminary agenda for the meeting

The topics that have been discussed during the physical local stakeholder consultation meeting which has been held on 24/02/2024 at Kano State Library as follows:

Time	Agenda
11:00-11:30	Welcoming and registration of the participants
11:30-11:45	Opening of the meeting Part 1: Presentation of Project
11:45-12:00	Introduction of the Partner Organizations, Objective of the Project, Milestone of the Project, Planned Area Of The Project & Implementation, The Project Strategy, Description of Technology, Maintenance & Repair Procedure, Stakeholder Feedback Round
12:00-12:30	Break
12:30- 13:15	Part 2: Gold Standard & Community Activity Project Requirements Climate Change & GHG Emissions, Carbon Credits, Gold Standard & Community Activity Project, Requirements, Carbon Rights, Sustainable Development Goals Part 3: Safeguarding Principles & Monitoring Safeguarding Principles & Monitoring, Continuous Input/Grievance Mechanism, Importance of Hygiene
13:15-13:45	Focus Groups Session Group presentations on findings
13:45-14:00	Completion of evaluation of the meeting Evaluation forms to be filled by attendees
14:00-14:15	Closing of the meeting
14:15-14:30	Q&A Session
14:30	Lunch

A.2. A non-technical summary of the project

Multi-Country PoA: Clean Water and Beyond in Africa Non-Technical Summary

Net Zero Climate Investments, acting as the Coordinating Managing Entity (CME) and project owner, will jointly implement the '**Clean Water and Beyond in Africa Programme of Activities (PoA)**'. This initiative aims to enhance livelihoods in Uganda and Nigeria by providing access to affordable, clean drinking water. These interventions utilize environmentally safe purification technologies to reduce carbon emissions.

Prioritizing areas for intervention based on household need is paramount. Selection of PoA areas for borehole drilling prioritizes locations without existing drinking water sources within a 1 km radius. Before PoA initiation, all necessary local permissions are obtained, fostering transparency and collaboration.

For borehole rehabilitation, compliance with Gold Standard criteria is confirmed, with priority given to areas lacking sufficient water supply within a 1 km radius. Preventive measures, such as labeling and protection, are implemented to signify the borehole's status as a Gold Standard project, building upon Net Zero's previous successful projects.

The process of drilling new boreholes begins by engaging a local partner to manage operations. Negotiations with local authorities determine optimal locations, and necessary permits are obtained before drilling begins. Hydrogeological surveys guide borehole placement, ensuring efficient water access. Throughout implementation, proactive communication with local authorities maintains transparency and compliance.

To address concerns regarding double counting, Net Zero Climate Investments emphasizes stakeholder engagement and maintains robust communication channels through a dedicated local team. Collaboration with local authorities is integral to prevent overlapping activities. Net Zero will work closely with local communities to drill new boreholes and rehabilitate existing ones, ensuring access to clean and safe drinking water.

Overall, the project adheres to environmental and social safeguards outlined by the Gold Standard and related methodologies, ensuring positive contributions to these aspects while addressing critical water and energy needs in **Uganda and Nigeria**.

Net Zero Climate Investments is committed to meeting ongoing needs in the field by drilling boreholes in areas where they are needed. **The project has a lifetime of 20 years, with the borehole projects designed to last for 15 years.** Both Net Zero Climate Investments and its local partners will ensure continuous monitoring of the projects to maintain their effectiveness and sustainability. This commitment underscores our dedication to making a long-lasting positive impact on the communities we serve.

UGANDA

Uganda, known as the "Pearl of Africa" due to its stunning natural beauty, is a country in East Africa that faces significant challenges in providing access to safe and clean water for its population. In Uganda, approximately only 16.65%¹ of the population has access to an improved clean water source. This means that many Ugandans rely on unimproved water sources such as rivers, ponds, and unprotected wells, which are often contaminated and unsafe for consumption. Over 70% of all diseases treated in Uganda

¹ [Uganda Clean Water Access 2000-2023 | MacroTrends](#)

stem directly from a lack of clean water or poor sanitation and hygiene techniques.² In many rural areas of Uganda, firewood is the primary source of fuel for boiling water to make it safe for consumption. This practice contributes to deforestation and environmental degradation, affecting the country's ecosystems and climate regulation. From 2001 to 2022, Uganda lost 1.03 Mha of tree cover, equivalent to a 13% decrease in tree cover since 2000, and 463 Mt of CO₂e emissions³.

Baseline surveys have been completed for the planned PoA areas in Uganda in accordance with Gold Standard (GS) criteria and it offers valuable insights into areas with the most critical water needs. The surveys in this region was conducted between 21/11/2022 and 25/11/2022, with a focus on areas experiencing high water demand.

NIGERIA

Findings have revealed that 69 million Nigerians, %35.0 percent of the population has no access to safe water. Only %9.2 percent of households drink safe water.⁴ These statistics underscore the pressing need for improved access to clean water, highlighting the significant proportions of the population in each country that lack this essential resource. In Nigeria, the recognition of drinking water as a social right has not yet been fully established.

The primary causes of the restricted availability of safe water for rural household's stem from either an insufficient number of accessible boreholes or the diminished effectiveness of existing boreholes due to insufficient maintenance and repair. As a result, these communities are left with no choice but to consume unsafe water from unprotected springs, rainwater collection, unprotected wells, and surface water sources. This, in turn, exposes them to waterborne diseases or forces them to resort to boiling water for safety. Most households in Nigeria rely on firewood as the primary source of fuel for boiling water and other domestic needs. This heavy reliance on firewood for water purification and cooking contributes to deforestation and environmental degradation in several ways. From 2001 to 2022, Nigeria lost 1.25 Mha of tree cover,

² [The Problem — WaterSchool](#)

³ <https://www.globalforestwatch.org/dashboards/country/UGA/>

⁴ [Access to Clean water in Nigeria \(know-morenigeria.blogspot.com\)](#)

equivalent to a 12% decrease in tree cover since 2000, and 671 Mt of CO₂e emissions.⁵ In the context of Nigeria's water challenges, the practice of boiling water using firewood not only contributes to deforestation but also perpetuates a cycle of environmental degradation. It is both energy-intensive and environmentally unsustainable, underscoring the urgent need for alternative clean water solutions that can alleviate the pressure on forests, reduce carbon emissions, and promote environmental sustainability.

The consequences of this limited access to clean drinking water are significant. Childhood illnesses, malnutrition, and a heightened rate of school dropouts among adolescent girls are just a few of the adverse outcomes. Additionally, those who resort to boiling water for purification rely on firewood and charcoal, which contribute to deforestation issues and lead to the emission of greenhouse gases.

Baseline surveys have been completed for the planned PoA areas in Nigeria in accordance with Gold Standard (GS) criteria and it offers valuable insights into areas with the most critical water needs. Baseline survey was completed in two phases to focus on areas experiencing high water demand. The first one was conducted between 06/07/2023 and 11/07/2023, while the second one was conducted between 20/09/2023 and 04/10/2023.

POA STAGES

CME's commitment to conducting local field research in Uganda, and Nigeria, leveraging the expertise of local teams, underscores the pressing need for clean water access in these regions. The findings from on-the-ground assessments reveal the urgent nature of the challenges, emphasizing the immediate necessity of addressing water-related issues to improve public health, livelihoods, and environmental preservation. The field survey conducted by the PoA's local partners has unveiled a concerning reality: the water supply and treatment infrastructure falls significantly short of adequately serving the districts within the PoA's geographical scope. Most of the districts are not covered by a functional water supply and treatment system. In fact, the availability of public boreholes is alarmingly sparse, and most of them are not operational as they should be.

⁵ <https://www.globalforestwatch.org/dashboards/country/NGA/>

Adding to this challenge is the accessibility of clean water to households. Despite being available for purchase, the socio-economic difficulties faced by most rural residents render them unable to afford this vital resource. Consequently, a critical gap exists in providing clean water to these communities. There are also water vendors in the area who sell untreated lake water in jerry cans to the community. The water drawn from lake is either consumed directly or is treated by boiling with firewood and charcoal or applying chlorine.

To address these formidable challenges, the Clean Water and Beyond in Africa (CWBA) is embarking on a comprehensive strategy across Uganda, and Nigeria. The PoA's initiatives encompass rehabilitation or opening new solar boreholes, tube wells, and hand-pumped boreholes in the field. Crucially, the PoA will prioritize the deployment of zero-emission technology for water treatment, supply and cooking aligning with locally available technologies endorsed by the respective governments. This environmentally conscious approach aims to significantly reduce greenhouse gas emissions resulting from the energy-intensive practice of boiling unsafe drinking water and cooking thereby mitigating the PoA's carbon footprint. Moreover, the PoA seeks to foster increased local stakeholder engagement, facilitating improved communication between CME and the communities it serves. This dialogue will enhance CME's commitment to addressing the specific needs of local populations, ultimately fostering a stronger partnership and a more effective response to the pressing issue of clean water access.

The eligibility criteria identified in Community Services Activity Requirements are met as follows:

- 2.1.2 Projects shall lead to climate change mitigation and/or adaptation by providing clean water to the households or communities. The project will decrease the fuelwood and charcoal consumption in households by providing safe drinking water and eliminate the need for boiling; therefore, reduce the GHG emissions.
- 3.1.1 The PoA will rehabilitate or implement solar panel borehole technology, tube wells, and hand-pumped boreholes. Looking ahead, the CME intends to expand the methodologies employed in the PoA, as part of CME's future vision.
- 3.1.2 PoA Boundary shall be defined in line with the applicable Methodologies and PoA Requirements. In the initial phase, PoA will cover Uganda and Nigeria.

TIMELINE OF THE PROPOSED POA

The PoA will commence in the last quarter of 2024 according to plans.

Expected Date	Activity
21/11/2022- 25/11/2022	Baseline Surveys conducted by the team for each Uganda
2023 last quarter	Legal Permissions from Local Authorities in the Field for each Host Country
2023 last quarter	Field Search By Local Field Team
2023 June, September, October	Baseline Surveys conducted by the team in different regions of Nigeria
11/10/2023- 11/11/2023	Conducting Multi Country PoA Consultation
2023 last quarter	Multi Country PoA Consultation Feedback Round
24/02/2024	Nigeria - Combined Physical Local Stakeholder Meeting at Real Case and Regular Level
24/02/2024	Nigeria – Gender Surveys conducted by local teams
03/03/2024	Uganda - Combined Physical Local Stakeholder Meeting at Real Case and Regular Level
03/03/2024	Uganda – Gender Surveys conducted by local teams
24/07/2024	Preliminary Review Submission
Rest of the 2024	Project Expected Implementation
2025 and the rest	Project Expected Monitoring

For more information about PoA structure, please visit:

<https://www.goldstandard.org/project-developers/standard-documents>

As Net Zero Climate Investments and the Coordinating/Managing Entity (CME) of the planned Programme of Activities (PoA), CME initially planned a multi-country PoA under the Gold Standard methodology of Safe Water Methodologies. Local stakeholder engagements and field analysis revealed a significant need for cookstoves. As a result, CME decided to adopt the TPPDTEC methodology as part of the PoA objective and sought financial investors for cookstove projects. However, due to sectoral fluctuations affecting investor decisions and our financial needs, CME faced some delays. To avoid

further delays and urgently address ongoing needs, the CME decided to move forward with the Safe Drinking Water Supply (SDWS) methodology.

TECHNOLOGIES TO BE USED IN POA

The project's framework will primarily employ Community Water System (CWS) technologies with a focus on the utilization of sustainable and environmentally friendly solutions in Uganda and Nigeria. These technologies include solar powered pumps, submersible pumps tube wells, hand-pumped boreholes, and rehabilitation of existing ones.

SUMMARY OF ECONOMIC, SOCIAL AND ENVIRONMENTAL IMPACTS OF THE POA:

The program of activities is poised to create diverse economic, social, and environmental impacts. The PoA's initiatives will actively contribute to better health and well-being by ensuring access to clean drinking water for households located within a 1 km radius, thereby reducing the risk of respiratory illnesses. Systematic efforts to raise awareness at the local level about safe water and hygiene practices will be undertaken, enhancing knowledge within the community.

Moreover, as the necessity for boiling water for purification diminishes with the implementation of boreholes and rehabilitation, there will be a notable reduction in the consumption of fuelwood traditionally used for boiling purposes. This reduction will lead to increased household savings, as expenses related to obtaining safe drinking water and acquiring non-renewable biomass for cooking will decrease significantly.

Furthermore, the project will contribute to the creation of employment opportunities by establishing roles for the operation and maintenance of its infrastructure. This not only ensures the sustainability of the project but also provides local communities with valuable skills and income-generating opportunities, thus fostering economic development and resilience within these regions.

SDGS SOCIAL AND ENVIRONMENTAL IMPACTS OF PROPOSED POA

8 DECENT WORK AND ECONOMIC GROWTH

Creating jobs:

6 CLEAN WATER AND SANITATION

Access to clean water and sanitation:

Findings have revealed that 69 million Nigerians, 35.0 percent of the population has no access to safe water. Only 9.2 percent of households drink safe water.

Through rehabilitation of existing boreholes and establishment of new boreholes safe and affordable drinking water will be made accessible to population.

15 LIFE ON LAND

Reduced deforestation:

Firewood is the main source of energy for boiling the untreated water. Most of the rural households in the area depend more on the forest for their biomass fuels, causing deforestation problems. When accessing safe water, there will be no need to boil unsafe water. This will have positive impact on forest degradation and deforestation related to firewood consumption for boiling purposes in the region.

3 GOOD HEALTH AND WELL-BEING

Improved health conditions:

Population in the project region do not have access to water within reasonable reach and the water quality does not comply with drinking water quality standards. Therefore, they inevitably expose to water borne diseases.

5 GENDER EQUALITY

Empowerment of women:

With less time spent on fuel wood collection, the risk of gender-based violence will also reduce. Furthermore, women will have more time available for leisure, education or opportunities for market employment that can raise their household status.

13 CLIMATE ACTION

Reduction of CO2 emissions:

Through rehabilitation of existing boreholes and establishment of new hand pumped boreholes, safe water will be made accessible to local population. This will reduce GHG emissions from boiling unsafe water. Also, the project will deploy zero-emission technology to treat and supply safe drinking water in accordance with the technologies available on the ground and indicated by the Government.

FEEDBACK FROM POA CONSULTATION

During PoA Consultation period, feedback from our valuable stakeholders has been received, and communication continues about their comments. The communication channels remain open to further discuss and address any additional insights they might have. All feedback that was received, correspondence details and actions taken will be transparently stated in the PoA Consultation Report and other relevant documents. Your valuable contributions are deeply appreciated. Please see the details of which have been shared below.

Company	Receive Date
Solvatten	11/10/2023
SustainCert	11/10/2023
Children Care Uganda	12/10/2023
Human Right activist	12/10/2023
Basi Go	13/10/2023
CO2Balance	16/10/2023
NEMA	25/10/2023

CME of PoA Net Zero Climate Investments believe in the power of collaboration and will involve local communities in every step, from planning to execution.

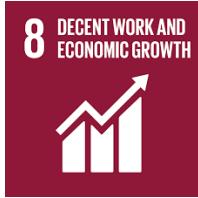

Your feedback is invaluable. Please fill the "**Clean Water and Beyond in Africa Feedback Form**" and share it at project@netzero.com.tr

A.3. Contact details to get further technical detail and project information

Organization	Role	Contact Details

A.4. Summary of economic, social and environmental impacts of the Project

Environmental impacts	 6 CLEAN WATER AND SANITATION	<p>Access to clean water and sanitation:</p> <p>42% of rural population in Nigeria use water from unimproved water sources, such as ponds, shallow wells, surface water such lakes and rivers. Also 78% of rural population lack Access to basic sanitation services. Through rehabilitation of existing boreholes and establishment of new hand pumped boreholes, safe and affordable drinking water will be made accessible to local population.</p>
	 13 CLIMATE ACTION	<p>Reduction of CO2 emissions:</p> <p>Through rehabilitation of existing boreholes and establishment of new hand pumped boreholes, safe water will be made accessible to local population This will reduce GHGs emissons from boiling unsafe water. Also, the project will deploy zero-emisson technology to treat and supply safe drinking water in accordance with the technologies available on the ground and indicated by the Government.</p>
	 15 LIFE ON LAND	<p>Reduced deforestation:</p> <p>Firewood is the main source of energy for boiling the untreated water. Most of the rural households in the area depend more on the forest for their biomass fuels, causing deforestation problems. When accessing safe water, there will be no need to boil unsafe water. Therefore, this will have positive impact on forest degradation and deforestation related to firewood consumption for boiling and cooking purposes in the region.</p>
Social & Economic Impacts	 3 GOOD HEALTH AND WELL-BEING	<p>Improved health conditions:</p> <p>Population in the project region do not have access to water within reasonable reach and the water quality does comply with drinking water quality standards. Therefore, they inevitably expose to water borne diseases.</p>
	 5 GENDER EQUALITY	<p>Empowerment of women:</p> <p>With less time spent on fuel wool collection to purifying water and cooking purposes, and sanitation efforts the risk of gender-based violence will also reduce. Furthermore, women will have more time available for leisure, education or opportunities for market employment that can raise their household status.</p>

	 <p>8 DECENT WORK AND ECONOMIC GROWTH</p>	<p>Creating jobs:</p> <p>Establishment of new boreholes, rehabilitation and maintenance activities will create temporary and permanent job opportunities for local people. The employees will acquire new skills and knowledge through trainings provided as well.</p>
--	---	---

A.5. Other relevant information to help stakeholders understand the project

The Expected GHGs emissions reduction of our project is 60,000 tCO2eq per year.

This figure may vary according to the survey results.

To help stakeholders better understand our project, we prepared a presentation⁶ with project details to be presented in the local stakeholder meeting. See below for the sample slides from the presentation.

⁶ The entire presentation can be provided, if necessary.

MEETING AGENDA

Time	Agenda
11:00-11:30	Welcoming and registration of the participants
11:30-11:45	Opening of the meeting
11:45-12:00	Part 1: Presentation of Project Introduction of the Partner Organizations, Objective of the Project, Milestone of the Project, Planned Area Of The Project & Implementation, The Project Strategy, Description of Technology, Maintenance & Repair Procedure, Stakeholder Feedback Round
12:00-12:30	Break
12:30- 13:15	Part 2: Gold Standard & Community Activity Project Requirements Climate Change & GHG Emissions, Carbon Credits, Gold Standard & Community Activity Project, Requirements, Carbon Rights, Sustainable Development Goals Part 3: Safeguarding Principles & Monitoring Safeguarding Principles & Monitoring, Continuous Input/Grievance Mechanism, Importance of Hygiene
13:15-13:45	Focus Groups Session Group presentations on findings
13:45-14:00	Completion of evaluation of the meeting Evaluation forms to be filled by attendees
14:00-14:15	Closing of the meeting
14:15-14:30	Q&A Session
14:30	Lunch

B.1.1. Appropriateness of methods

The project is aimed at the communities in Nigeria. An announcement regarding the meeting was circulated in a local newspaper to extend an invitation to all interested

local communities. Additionally, on 11.10.2023, email invitations were dispatched to local policymakers, representatives of local authorities, community leaders, NGOs, and governmental organizations associated with our project.

Advertisements were translated into the Hausa and displayed in various regions of Nigeria. Invitation letters were sent via email in both English and Hausa to ensure accessibility for locals who do not speak English. In addition, flyers were posted on the different areas in region. For invitation letter and flyer samples please refer to section B.1.3 and B.1.4.

Communication was established with the Designated National Authority, international, and local Non-governmental Organizations via email. Invitations were also sent via email to representatives from the Gold Standard and supporters of the Gold Standard NGO. Categories of group were determined according to the Template Guide V2.0 Guide Stakeholder Consultation Report.

B.1.2. Gender Sensitivity

In certain communities, the dynamics of power influence who feels comfortable expressing their opinions or concerns during meetings. Here this issue was not apparent because the meeting moderated by a woman. Throughout the project, significant emphasis was placed on providing employment opportunities to women during engagements with local communities. The presence of female coordinators/employees at the LSC Meeting facilitated seamless communication for local women, enhancing accessibility and engagement

Gender Survey was conducted after the Local Stakeholder meeting. Because this gender survey involves questions about gynological health and can be culturally private for women, women surveyors were employed to make the respondents more comfortable during the survey. Consequently, an overrepresentation of hierarchy or a specific gender in a physical gathering might deter stakeholder groups from freely engaging. To address this, a unified meeting involving all stakeholders was organized. However, during focus group sessions, separate discussions were facilitated for women and men to ensure active participation from women and gather their perspectives. After the meeting, specifically women were given floor to get their feedback about the project was.

Summary of Gender Surveys Conducted in Nigeria

The survey aimed to gather data on gender-specific challenges related to water and biomass collection, economic difficulties, and health issues.

Survey Overview:

A total of 74 gender surveys were conducted. The survey team comprised local women surveyors and one representative from Net Zero Climate Investments. Among the respondents, 54 were women.

Key Findings:

Economic and Domestic Work: 38 out of 54 women respondents (70.4%) reported being engaged in domestic work activities. Respondents expressed a desire to spend more time on improving their domestic work and daily activities if they had access to clean water and sanitation, rather than wasting time gathering these resources.

Health Issues: 39 out of 54 women respondents (72.2%) indicated facing gynecological health problems monthly or more frequently, primarily due to the scarcity of clean water.

These findings underscore the significant gender-specific challenges faced by women in the surveyed areas, particularly in terms of time burden, economic inequality, and health issues.

These challenges have been addressed both before and during the project implementation phase. As part of the project objectives, CME will continue to consider and address these challenges to ensure that the project remains gender-responsive and effectively supports the needs of the community.

B.1.3. Evidence proving invites took place as stated

In addition, NGOs who focus on gender issues and are especially active in Nigeria have received an email invitation to the meeting. Emails have been sent to the groups that support women in rural regions in building their capacities.

Our meeting's invitation was announced in a Nigerian newspaper, Daily Trust. Please find related photos below:

Insecurity: Sharia council seeks more powers for governors

By Faruk Shashibu

The Supreme Council for Sharia in Nigeria (SCSN) has called on the National Assembly to grant more powers to state governors in controlling the security affairs of their states.

The council is a communiqué issued yesterday at the end of its two-day conference urging the federal government to do all it takes within the ambit of the law to bring peace and end to the prevailing insecurity situation in the country.

The communiqué, which was signed by its President, Sheikh Abubarakad Hadiyatullah, and Secretary General, Dr. Nafisatu Isha Aremu, said that through improved and effective intelligence gathering and deployment of security personnel, all flash points of security threats Nigeria would not in on current security lapses by the end of the year.

"We also need the promotion of community-based policing and existing governance bodies, security forces and local communities. Additionally, a constitutional review is required," said the council.

1 killed, 30 houses razed in Kogi communal clash

By Tijani Labaran

L'Aska

One person, identified

as Samuel Peter, was

killed while 30 houses

were burnt down in a communal clash

in Odo-Odo and Odo-Ope communities

in LGA of Kogi State.

Tension was said to have been high for days between the two communities and the police were deployed to the crisis, crowding, leading to the killing of a youth leader in the area and the destruction of properties, including houses and motorcycles.

Daily Trust gathered that about 100 persons had fled to be an inhabitant of Odo-Odo, many others reportedly have deserted the area and relocated to neighbouring towns and refugee, so as to avoid being caught in the crisis.

state governors to perform more effectively their statutory roles as Chief Security Officers of their States," noted.

The conference which condemned absolutely the sustained killings, maiming and attacks on innocent people across the country called on the "governments to launch a full-scale investigation and punishment of those responsible for the killing."

While saying that the government should expedite action in implementing programmes to curb terrorism and insecurity, it commended the Nigerian government's programme to recognise LGBTQIA+.

"The Nigerian government should establish a principled stand in condemning the ongoing Israel Palestine conflict and continue to support the resolution of the crisis with stand by taking a strong stance against that violation of human rights, and stand on the side of justice and lasting solution to the crisis," he said.

Meanwhile, members of the Supreme Council for Sharia in Nigeria (SCSN)

urged them and changing their religion and identity, which is a blatant violation of their rights. We must call upon relevant law enforcement agencies across the country to end the "government's failure to launch a full-scale investigation and punishment of those responsible for the killing."

While saying that the government should expedite action in implementing programmes to curb terrorism and insecurity, it commended the Nigerian government's programme to recognise LGBTQIA+.

"The Nigerian government should establish a principled stand in condemning the ongoing Israel Palestine conflict and continue to support the resolution of the crisis with stand by taking a strong stance against that violation of human rights, and stand on the side of justice and lasting solution to the crisis," he said.

He said President Tinubu gave assurance and may encourage remarks by calling for the protection of lives and the development of the country.

He said President Tinubu

is making efforts to end the conflict and tackle insecurity heading to us to achieve food security.

The SCSN also endorsed the communiqué of just concluded conference which resolved the 2023

communiqué of the conference.

He said President Tinubu

gave assurance and may encourage remarks by calling for the protection of lives and the development of the country.

CLEAN WATER AND BEYOND IN AFRICA

We are thrilled to announce our Clean Water and Beyond in Africa Multi-Country PoA dedicated to create social impact in Africa!

As Net Zero Climate Investments, our mission is to make a positive difference by opening new boreholes and supporting communities.

Between 11.10.2023 - 12.11.2023. We've already engaged with stakeholders online to gather valuable insights. Now, it's time to take our commitment a step further.

Local Stakeholder Meeting

Date: 24 February 2024

Location: Kano State Library

Join Us at 24th February! We cordially invite locals to a Physical Local Stakeholder Meeting in Kano State Library, It is very important for women to be present in this meeting for we do need your support .

This is your chance to share your ideas and comments about the borehole project and exchange ideas with us.

Shettima urges African leaders to ramp up 3% of continent's global GDP

By Musade Chanyi

the VP stated.

In his brief remark at the luncheon which was held at Karpark Village, Dovecote-Khartoum, Shettima pointed out that it is in this season that Africa is considered by many analysts as one of a growth economy in due of investments and infrastructures.

The vice president told African leaders that economies of scale "lend the ability to do more" by coming together to form a more formidable unit, with a bigger voice and stronger negotiating abilities.

The vice president, in a statement on Thursday by his spokesman, Stanley Nsuecha, urged that in running and purposefully the continent's business of the world in eradicating crass poverty on the continent and prove that Africa can be a significant contributor to world productivity that can integrate better with the rest of the world at an age when Artificial Intelligence and Machine Learning are reduplicating human interactions and existence.

The vice president noted that while African trade agreements are still less than 3% of world trade. These indices must be reversed and ramped up. He believes that is one of the key concerns of the Africa Economy of Scale.

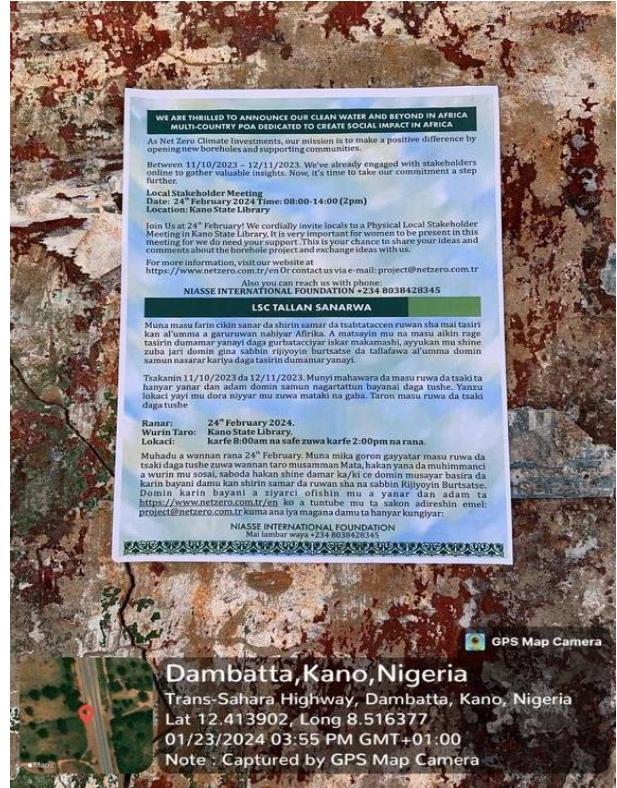

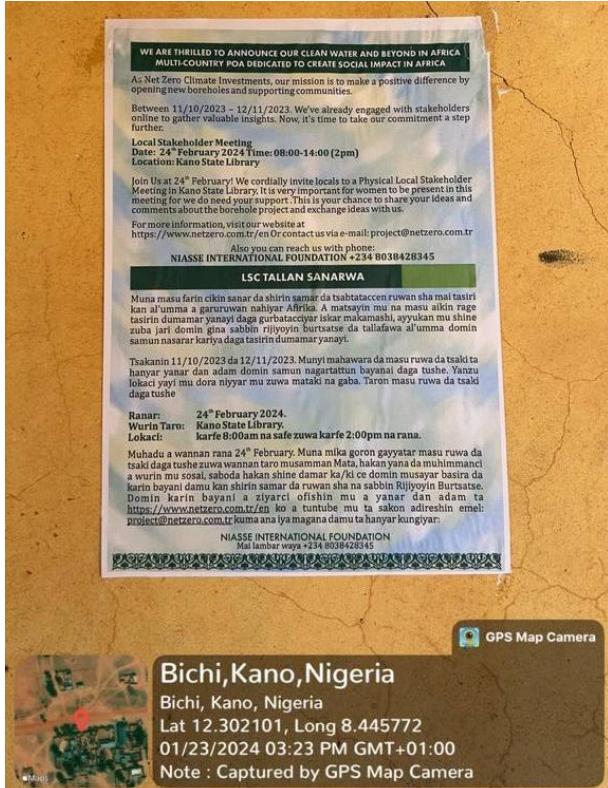

"It must be born in mind that African economies are still largely primary and basic in nature, with considerable dependence on the global market. Many countries on our continent are still known for their export of raw materials, mineral and food crops. Africa must move forward and that we must begin to add value to primary products like cash crops and step up our industrialisation and product manufacturing."

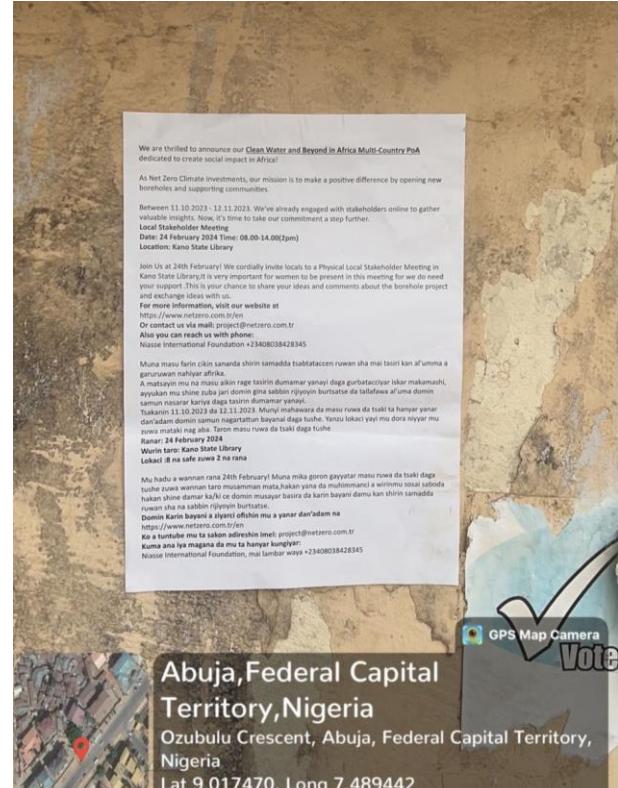

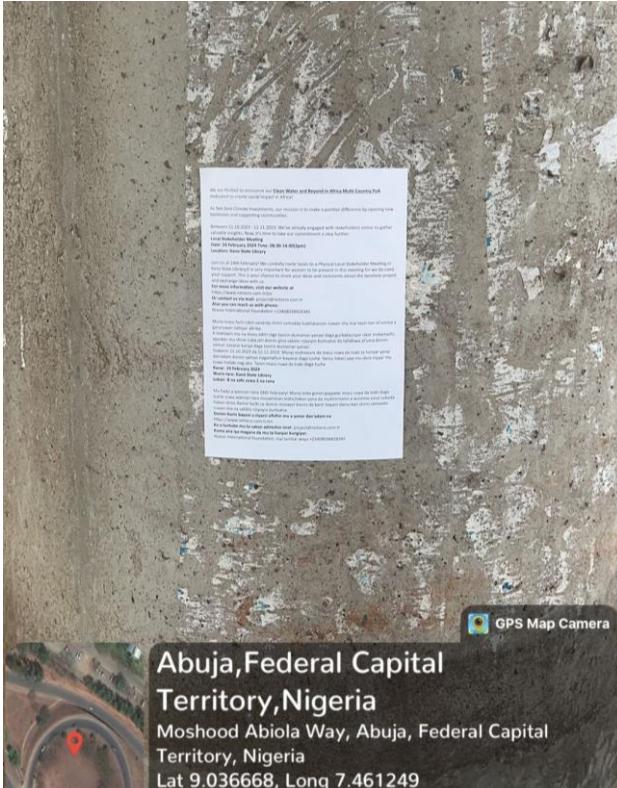

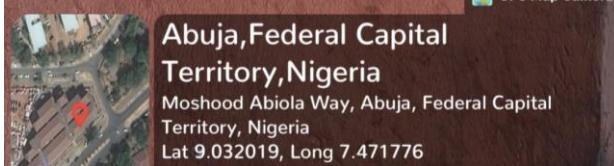

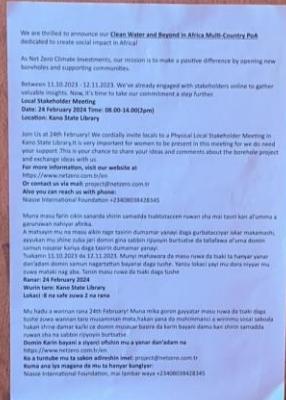

The vice president added that while African trade agreements are still less than 3% of world trade. These indices must be reversed and ramped up. He believes that is one of the key concerns of the Africa Economy of Scale.

"It must be born in mind that African economies are still largely primary and basic in nature, with considerable dependence on the global market. Many countries on our continent are still known for their export of raw materials, mineral and food crops. Africa must move forward and that we must begin to add value to primary products like cash crops and step up our industrialisation and product manufacturing."

Flyers containing meeting information were posted on walls in Kano and Abuja:

B.1.4. Sample content of invites (for each Method above)

Invitations were also sent via e-mail. Non-technical summary of the project and Summary of Likely Contributions of the Project to Sustainable Development Goals (SDGs) were also provided with in the invitation. Please see below:

[Clean Water and Beyond in Africa Non-Technical Summary - updated.pdf](#) 572 KB

Dear Esteemed Stakeholders,

We hope this message finds you in good health and high spirits.

At Net Zero Climate Investments, our commitment to catalyzing positive change through our **Multi-Country PoA, "Clean Water and Beyond in Africa PoA,"** burns with passion. Today, we're thrilled to reach out and share some exhilarating updates about our project.

As part of our Net Zero Climate Investments Program of Activities, we're gearing up for two transformative initiatives: the construction of boreholes and the distribution of cookstoves. While our initial focus remains on Nigeria and Uganda, our determination to broaden our impact knows no bounds.

To kickstart the implementation of these initiatives, our upcoming stakeholder meeting will feature combined Real Case Level and Regular Case Level VPA LSC sessions. This unified approach ensures thorough discussions and strategic planning to effectively tackle the challenges and opportunities ahead.

Our primary objective with this PoA is clear: to reduce emissions by **installing new solar boreholes and distributing efficient cookstoves**, thereby enhancing public access to clean water and optimizing cooking methods in **Uganda and Nigeria**.

Aligned with the Gold Standard, our proposed PoA aims to secure carbon credits, which will be reinvested into voluntary emission reduction projects within the region, ensuring the sustainability of maintenance and repair efforts over the long haul.

Having successfully concluded our online PoA Consultation, we're now eager to infuse energy and enthusiasm into a face-to-face gathering at the vibrant Kano State Library! With invitations extended through various channels, including newspapers and flyers, we're excited to warmly invite you to join us.

The Stakeholder Consultation Meeting has been meticulously arranged to delve into discussions concerning the project's design and its profound impact on sustainable development. Mark your calendars for **February 24, 2024, at 11:00 am, at the Kano State Library**. Your insights and suggestions as concerned stakeholders are invaluable to our success, and we eagerly anticipate your active participation.

For registration and further information about the event, please contact us at project@netzero.com.tr. You can also visit our website at <https://www.netzero.com.tr> for additional details.

Your presence at the Stakeholder Consultation Meeting holds immense significance, especially for the inclusion of women, whose support we deeply value. Please also see the updated non-technical summary of the PoA.

C.1.3. Pictures from the physical meeting(s) (best practice)

C.2. Minutes of physical meeting(s)

I. Welcoming and registration of the participants

At the entrance of the hall where the meeting was held, Net Zero team welcomed the participants people with local people who know the local language and English at 10:00 am.

II. Opening of the meeting (Please write your notes)

The presenter, Mr. Abdulwahab, called on Mr. Muhammad Sami, chairman of Net Zero, for the opening. Mr. Muhammad Sami welcomed the audience, began his introductory speech and provided information on climate change and Net Zero, which Mr. Abdulwahab translated into Hausa.

III. Part 1: Presentation of Project

- ✓ *Partner Organizations*
- ✓ *Objective of the Project*
- ✓ *Location of the Project & Implementation*
- ✓ *The Project Strategy*
- ✓ *Description of Technology*
- ✓ *Maintenance & Repair Procedure*
- ✓ *Stakeholder Feedback Round*

Project strategy was stated, which includes the cooperation of local stakeholders. It later emphasized sustainable development goals and the implementation of goals, including poverty eradication and sanitized clean water.

Description of the technology: The technology of the project solar technology was stated, and explained to have no negative effects on the environment and does not emit any unwanted gases.

Maintenance and repair: Maintenance and repair of the water wells were explained. It was stated to the local stakeholders to assign a team in their respective villages to take care of the water wells and report any issues that may arise for repair. The importance of a logbook was stated and explained.

Stakeholder Feedback Round commenced. Series of questions started from the stakeholders.

The objectives of the project were articulated by Net Zero Team, to include the provision of clean water in a sustainable manner without polluting the environment. One of the local foundation, which helped the stakeholder meeting organization, Niasse International Foundation also explained the purpose and objectives of the Net Zero Climate Investment in local language.

Question 1:

Garba Ahmet from Dribo village in Takai local government, commented: "I didn't hear you talking about planting trees to reduce deforestation."

Response 1:

It has explained that the main aim of the project is to reduce deforestation. The installation of solar panelled water wells will significantly contribute to achieving this goal.

Question 2:

Ali Abdullahi from Tattarawa village in Dawakin Tofa local government asks, "Will this borehole be piped to different streets in our community so it will reduce congestion, and we hope a light and a CCTV camera will be mounted to the borehole which will provide security to the water wells in case of vandalism."

Response 2:

Your question is received and will be taken into consideration. Thank you.

Question 3:

Aisha Muhammad commented: we are very thankful and happy for everything

Response 3:

Appreciation received.

IV Part 2: Gold Standard & Community Activity Project Requirements

Climate Change & GHG Emissions

- *Carbon Credits*
- *Gold Standard & Community Activity Project Requirements*
- *Carbon Rights*
- *Sustainable Development Goals*

- Context: Climate change is a global concern driven by the increase in greenhouse gas (GHG) emissions, leading to adverse environmental impacts.
- Mitigation Strategies: Aim to reduce GHG emissions through sustainable practices, renewable energy adoption, and carbon offset projects.
- Definition: Carbon credits represent a unit of measurement for the reduction, avoidance, or removal of greenhouse gas emissions.
- Additionality: Projects must demonstrate that they go beyond business-as-usual practices in reducing emissions.
- Sustainable Development: Must contribute to sustainable development goals and benefit local communities.
- Stakeholder Engagement: Involvement of local communities in the project design, implementation, and monitoring.
- Connection to Carbon Projects: Carbon offset projects, especially those adhering to the Gold Standard, often align with multiple SDGs.
 - Example Connections:
 - Goal 7 (Affordable and Clean Energy): Renewable energy projects.
 - Goal 13 (Climate Action): Emission reduction initiatives.
 - Goal 8 (Decent Work and Economic Growth): Community engagement projects.
- Balancing Environmental and Social Impact: Striking a balance between emission reduction goals and the well-being of local communities.
- Holistic Sustainability: Recognizing that carbon projects should not only address climate change but also contribute positively to broader sustainability objectives.

III. Part 3: Safeguarding Principles & Monitoring (Please write your notes)

- ✓ *Safeguarding Principles & Monitoring*
- ✓ *Continuous Input/Grievance Mechanism*
- ✓ *Importance of Hygiene*

Proactive Approach: Emphasizing prevention over reaction to potential risks and harm.

Inclusivity: Addressing the needs and concerns of all individuals, with special attention to vulnerable groups.

Regular assessment and oversight to ensure adherence to safeguarding principles.

Continuous improvement through feedback and evaluation.

User-Friendly: Ensure accessibility and ease of use for all individuals.

Personal Hygiene: Emphasizes individual cleanliness for health and well-being.

Public Health: Good hygiene practices contribute to overall public health, reducing the risk of illnesses.

IV. Part 4: Focus Groups Session (Please write your notes)

- ✓ Focus Groups Session
- ✓ Evaluation of the Meeting

During the meeting, break time was given, and where the locals were, asked to make groups and get group leaders to answer some of the questions. These forms were served in doubles were the locals were given chance to interact and answer them with the guidance of the Net Zero member.

Focus group session commenced in which the 10 local governments are grouped into 5 groups that is 2 local government per group.

LSC evaluation forms shared among the groups and then forms were filled by groups. Focus group presentation carried out by individuals representing their respective groups by:

- 1- Manyana kumbo a male representing kura local government
- 2- Garba idris representing a male unggoggo local government.
- 3- Ali Abdullahi a male representing dawakin tofa local government.
- 4- Hadiza bala a female umar representing
- 5-Talle mamani a female representing bichi local government.
- 6-Rufaida Ibrahim a female representing rano local government.
- 7- Ariba sagiru a female representing gezawa local government.

Gathering In-Depth Insights: Focus groups aim to collect qualitative data by facilitating group discussions among participants.

Understanding Perspectives: Providing a platform for participants to share their perspectives, experiences, and opinions on specific topics.

Structured Agenda: A well-defined agenda to focus on key topics and questions.

Open Dialogue: Encourages open and honest communication among participants.

Achievement of Objectives: Reviewing whether the meeting successfully addressed its intended goals.

Quality of Insights: Evaluating the depth and richness of the information gathered during the session.

Focus Group Sessions

The Focus Group Session will involve discussions and evaluations regarding our project's contributions to the Sustainable Development Goals.

v. Closure of the meeting

The Local Stakeholder Consultation (LSC) meeting held at the Kano State Library, organized by Net Zero Investments in collaboration with Niasse International Foundation (NIF), aimed to enlighten the community about project activities with the following overarching goals:

Enhancing livelihoods in rural areas by providing accessible, affordable, and clean drinking water to targeted communities. This is achieved through the implementation of environmentally safe borehole technologies, thereby reducing carbon emissions.

The specific focus is on reducing carbon emissions associated with water treatment through the drilling of boreholes.

During the LSC meeting, Net Zero Investments highlighted that these projects not only contribute to environmental sustainability but also positively impact the livelihoods of locals. Job opportunities are generated during the implementation phase, and there is a concerted effort to reduce gender inequality by easing the burden on women. This includes providing clean water and rehabilitation, which not only saves time but also promotes equality in household responsibilities.

The team outlined the project strategy and related activities based on two pillars:

Infrastructure Development: This involves the construction of new boreholes to ensure a secure water supply to targeted districts. The project aims to ensure that the population has access to water points within a maximum of 1 km from their houses or within a 30-minute walking distance.

Capacity Development: The project supports access to basic and improved sanitation and hygiene by conducting periodic workshops to train the local population on Water, Sanitation, and Hygiene (WASH) practices.

The team concluded by stating that the proposed project will be developed under the Gold Standard, emphasizing its commitment to reducing carbon emissions. The Gold Standard is a voluntary carbon offset program focused on advancing the United Nations' Sustainable Development Goals (SDGs) and ensuring that projects benefit their neighboring communities. The project aligns with various SDGs, including Gender

Equality, Good Health and Well-Being, Decent Work and Economic Growth, Clean Water and Sanitation, Climate Action, Life on Land.

As part of Net Zero Climate Investment's contribution, respondents were also asked to evaluate the presentation and the meeting. To assess their feedback, the LSC evaluation form was distributed to gather input from locals regarding the meeting.

What is your impression of the meeting?	Addressing the challenges of global warming.
What do you like about the project?	Compensating the organization emission through supporting those projects that offset those emission by carbon credit.
What do you dislike about the project?	Nil
Comments	Training and awareness campaign is necessary for the local people to know the effect of emission and as well the importance of carbon credit.

I consent to the above-mentioned information being shared with the public.

C.2.1. Minutes of other consultations

>> N/A

C.3. Assessment of comments from all consultations above

Gender of Stakeholder	Stakeholder comment	Was comment taken into account (Yes/ No)?	Explanation/ Justification (Why? How?)
Male	I didn't hear you talking about planting trees to reduce deforestation.	Yes	Net Zero team explained to him that the main aim of the project is to reduce deforestation. The installation of water wells with solar panels will contribute significantly to achieving this goal.
Male	We are very thankful and happy for everything	Yes	Appreciation accepted.
Male	Will this borehole be piped to different streets in our community so it will reduce congestion, and we hope a light and a CCTV camera will be mounted to the borehole which will provide security to the water wells in case of vandalism.	Yes	The question is received and will be taken into consideration. At the design phase of project, these comments will be considered.
Male	How can we sanitize the water of this borehole	Yes	Net Zero team explained safely storing this water

	when it's drilled for safer storage?		is crucial for its safe usage. It's important to store it in sanitary containers with a securely closed lid to prevent contamination and ensure its safety for use, thus avoiding the risk of diseases.
Male	Is there any subsidy that will be provided to the caretaker of this borehole?	Yes	Net Zero team explained: Yes, of course, that's possible. However, it's important to note that this project falls under the climate investment category and will be maintained for 15 years. As a carbon emission project, the borehole is for the community's benefit, and it is essentially your borehole.
Female	Whenever I go to school, I've been told that drinking bad water is bad for health. When I come back home, I have no option but to drink that bad water, so I must save the little money I have been saving to start a business to buy pure water sometimes, because the dirty water made me sick. So I am really happy	Yes	Net Zero responded: Yes, consuming bad water can have serious negative consequences for your health. Contaminated water can harbor harmful bacteria, parasites, and chemicals that can cause various illnesses.

that this borehole will be drilled, now I can save my money. And lastly, I have a question: Does this bad water affect our health?

Female	We women especially suffer from a lack of water, especially good water, as we want to rear fish to enhance our business. We've been wanting to start a fish business, but due to a lack of good water, we can't do that. We hope this project will provide us with clean water so we can proceed to rearing fish.	Yes	The aim of this project is to provide clean and sanitized water that can be used for drinking, personal hygiene, and other purposes.

Signature	

Name	Asha Dahiuru
Gender – Male/Female:	Female
What is your impression of the meeting?	I am very happy with this meeting because have get water in village.
What do you like about the project?	This project have help us to get good water ot clean water and will help us to start business by fishing or garden.
What do you not like about the project?	In this project everything goes good.
Signature	

C.2. Summary of alterations based on comments

Positive and constructive input was received throughout the stakeholder consultation, as you can be seen from the comments. However, the majority of the feedback was directed towards queries on project technology and mechanism operating, rather than project design or monitoring techniques. The project design does not need to be changed in response to stakeholder feedback.

This was already the initial plan for the project, but CME reassured the community, When needed, as is the case now, employing people in the local community will be prioritized. When it comes to local community being a part of monitoring process part, CME has designed a system that is consisting 2 parts, logbook system and continuing feedback. In the logbook system, community leaders receive logbooks that can be filled out with feedbacks from the project and this logbooks will be monitored by the PD. With the continuing feedback system, everyone in the community can send their feedbacks through e-mail or from the website of the PD. These are not alterations but how PD intended the project design would be in the first place.

SECTION D. CONTINUOUS INPUT / GRIEVANCE MECHANISM

Please use the table below to report on the methods agreed with stakeholders

	Method Chosen (include all known details e.g. location of the book, phone, number, identity of mediator)	Justification of Choice (best practice)
Continuous Input / Grievance Expression Process Book (mandatory)	The logbook is delivered to different leaders that can be accessible for all the communities from different locations.	
GS Contact (mandatory)	help@goldstandard.org	
Telephone access (optional)	Nigeria : +234 809 222 9301 Türkiye: : +90 533 636 21 28	The most common and possible feedback mechanism in Nigeria is telephone and e-mail. Local language-speaking people from the local team were recruited to break the language barrier.
Internet/email access (optional)	Project Owner: project@netzero.com.tr Local Participant: Info@adikafoundation.com	The most common and possible feedback mechanism in Nigeria is telephone and e-mail. Local language-speaking people from the local team were recruited to break the language barrier.
Nominated Independent Mediator (optional)	-	The reason that this option is not chosen is that this option may make the process harder and not direct. Direct feedback from locals is always preferred.
Other	-	

The logbook screenshots of the logbook that is delivered is below. Please note that the logbooks are delivered physically.

CLEAN WATER AND BEYOND IN AFRICA MULTI COUNTRY POA TECHNICAL SUMMARY

Net Zero Climate Investments, as the Project Owner of the proposed PoA, will jointly execute the 'Clean Water and Beyond in Africa Programme of Activities (PoA)'. This initiative will be rolled out in Uganda and Nigeria. This PoA will be developed with two Gold Standard methodologies; one is safe water methodology; the other one is clean cooking methodology.

Main objective of the PoA is to improve the livelihoods living in Uganda and Nigeria by providing sufficient, affordable and clean drinking water to targeted communities within reasonable proximity and using borehole technologies that are safe for the environment thus reducing the carbon emissions. Also distributing efficient cookstoves to reduce emissions.

To address these formidable challenges, the Clean Water and Beyond in Africa (CWBA) is embarking on a comprehensive strategy across Uganda, and Nigeria. The PoA's initiatives encompass rehabilitation or opening new solar boreholes, tube wells, and hand-pumped boreholes in the field. Crucially, the PoA will prioritize the deployment of zero-emission technology for water treatment and supply, aligning with locally available technologies endorsed by the respective governments. In addition, cookstoves will be distributed where there is safe drinking water need.

This environmentally conscious approach aims to significantly reduce greenhouse gas emissions resulting from the energy-intensive practice of boiling unsafe drinking water, thereby mitigating the PoA's carbon footprint. Moreover, the PoA seeks to foster increased local stakeholder engagement, facilitating improved communication between PD and the communities it serves.

The program of activities is poised to create diverse economic, social, and environmental impacts. The PoA's initiatives will actively contribute to better health and well-being by ensuring access to clean drinking water for households located within a 1 km radius, thereby reducing the risk of respiratory illnesses. Systematic efforts to raise awareness at the local level about safe water and hygiene practices will be undertaken, enhancing knowledge within the community.

SECTION E. STAKEHOLDER FEEDBACK ROUND

- Please check this box if the project is retroactive and has done only 1 consultation with a physical meeting integrated into the SFR.

E.1. Length of the Feedback Round

Stakeholder Feedback Round		Planned	Actual
Start Date	01/03/2025	<input checked="" type="checkbox"/>	<input type="checkbox"/>
End Date	01/04/2025	<input checked="" type="checkbox"/>	<input type="checkbox"/>

E.2. Summarise how all stakeholders were/will be invited to provide feedback

>> Stakeholders that are invited to the Kano State Library was invited to Local Stakeholder Meeting that happened in 24/02/2024. Feedback round is planning to be started at the 01/03/2025 and end at 01/04/2025.

>> Summary of giving logbooks to the community.

Logbook process is clearly explained to all the stakeholders that were present at the meeting. After the meeting, in total of 12 logbooks were distributed to the local stakeholders from different villages of the project area. In the project implementation phase, more logbooks will be distributed according to exact project location. Logbook recipients are specifically chosen as someone who people can reach easily. People who received the logbooks were introduced in the meeting, that way people can know who to find.

In the meeting and after the meeting, our phone numbers, our local representatives phone number and e-mail address were given to the all stakeholders.

E.3. Summarise Feedback received, including if any changes in project design were made

>>

Revision History

Version	Date	Remarks
1.2	5 May 2022	Addition of grouped consultation info, preliminary agenda and section to justify retroactive consultation took place. Minor edits to text.
1.1	14 October 2020	Inclusion of Key Project Information Restructure, new headings and reorder to better match the steps a developer will follow in consultations. Removal of some non-mandatory template tables (Blind Sustainable Development Assessment). Clarification of best practice steps that are non mandatory processes, clarification of mandatory discussion points. Clarification regarding publishing names and that original evaluation forms (optional) and attendance lists (mandatory) should be separate documents. Improved clarity on Stakeholder Feedback round section and procedures for retroactive projects Provision of an accompanying Guide to help the user understand detailed rules and requirements
1.0	14 August 2017	Initial adoption
